

WILLIAM MAK

Personal Data

ADDRESS	Omitted from this posting	EMAIL	william@wmak.io
PHONE	Omitted from this posting	GITHUB	wmak
EDUCATION	Honours BSc, University of Toronto, Computer Science		

Technical Skills

LANGUAGES	Python, Go, C, Shell, L ^A T _E X, JavaScript
SOFTWARE	Git, vim, Jenkins, Sublime, svn, TextMate
OPERATING SYSTEMS	arch <i>linux</i> , Debian, Fedora, Mac OS X, Windows
FRAMEWORKS	AngularJS, Django, Selenium, PhoneGap

Work Experience

MARCH 2015	Software Developer at <i>Media Resources</i>
PRESENT	<ul style="list-style-type: none">- Developing a web portal to display diagnostics on a company's digital billboards.- Created a page allowing users to layout any number of webcams on a page to view them simultaneously- Setup, configured and maintained a Jenkins instance to automate development and production releases- Used PaperJS to create responsive live visual representations of billboards.- Allowed users full customization of brightness schedules through a step chart created through Highcharts
JUN 2014	Programmer at <i>University of Toronto</i>
AUG 2015	<ul style="list-style-type: none">- Constructed a mobile application using JavaScript via PhoneGap and AngularJS- Designed the user interface based on user input(ie. Director of <i>The Hub</i>).- Wrote a Python script that used Twitter's API to create a blogpost for the Vice-Principal of Research, U of T Scarborough.
SEP 2012	QA Automation Engineer <i>Kobo</i>
DEC 2013	<ul style="list-style-type: none">- Engineered tests using Selenium Webdriver library based on the Page Object pattern.- Performed Exploratory Testing to identify and communicate defects to developers.- Investigated failures with the system to diagnose the root cause of the issue and created defects reports on findings.- Configured and maintained a continuous integration test suite using Jenkins.- Participated in the Agile Scrum process.- Critiqued and reviewed UX designs.

Personal Projects

- Created a web automation framework around selenium: [selenate\(github.com/wmak/selenate\)](#), with over 1000 downloads in the first 3 days of release.
- Designed an [algorithm\(wmak.io/t\)](#) using unicode that would be able to store Latitude and Longitude in 4 characters, accurate up to 7 decimal points.
- Participating in an open source project [Hermes\(github.com/hermes\)](#), a distributed unlimited redundant backup solution written in Go.
- Developed a golf swinging analysis program [swingr\(github.com/swingr\)](#) that through the use of OpenCV would track the head of a golf club giving a user a relative score against a "master" swing.
- Created an image analysis program [iris\(github.com/IrisDS\)](#) that could locate the relative positions of the capturing devices from one another using OpenCV and python.
